LILY SEEDS

LILIUM TENUIFOLIUM

A domestic grower tells us that *tenuifolium* easily produces perfect stand from seed and even when left in seed rows throws abundant blooms already the second year. It grows very much quicker than the well known Regal Lily and is infinitely more hardy. It will not freeze back in spring as Regal does and is generally much more resistant to bugs and diseases.

Our seed crop in Japan has failed to come through but we have been fortunate in finding domestically a small supply of seed which we offer, subject to prior sale at \$3.00 per $\frac{1}{2}$ oz.

Please accompany your orders with remittance. No packing or postage charge on Lily Seed.
